

Association for
**Sustainable Agriculture
& Food in Poland**

Sustainable agriculture is any activity that reduces the impact of agriculture while preserving its profitability and ensuring its social acceptance

Benefits for farmers from sustainable agricultural practices:

optimizing **inputs** for agricultural production

building a **competitive advantage** for the farm

ensuring the long-term **financial sustainability** of the farm

obtaining more **financial support** under the EU CAP

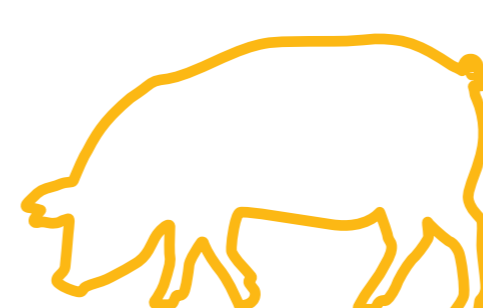

reducing the **environmental impact** of agriculture

improving the **fertility and productivity** of farm soils

increasing **societal acceptance** of agriculture

ensuring **animal welfare**

Why is sustainable agriculture for you?

Because you are a farmer who cares about the environment and animal welfare, the long-term financial stability of the farm and the positive public perception of agriculture.

Sustainable agriculture pays off to everyone!
